A. Artifact appendix

Submission and reviewing guidelines and methodology:
http://cTuning.org/ae/submission.html

A.1 Abstract

Obligatory

A.2 Artifact check-list (meta-information)

Obligatory. Use just a few informal keywords in all fields applicable to your artifacts and remove the rest. This information is needed to find appropriate reviewers and gradually unify artifact meta information in Digital Libraries.

- **Algorithm:**
- **Program:**
- **Compilation:**
- **Transformations:**
- **Binary:**
- **Data set:**
- **Run-time environment:**
- **Hardware:**
- **Run-time state:**
- **Execution:**
- **Output:**
- **Experiments:**
- **Workflow frameworks used?:**
- **Publicly available?:**

Obligatory. Provide brief assessment of your artifacts based on https://www.acm.org/publications/policies/artifact-review-badging:

- **Artifacts publicly available?:**
- **Artifacts functional?:**
- **Artifacts reusable?:**
- **Results validated?:**

A.3 Description

A.3.1 How delivered

Obligatory

A.3.2 Hardware dependencies

A.3.3 Software dependencies

A.3.4 Data sets

A.4 Installation

Obligatory

A.5 Experiment workflow

A.6 Evaluation and expected result

Obligatory

A.7 Experiment customization

A.8 Notes
